TO NEW  
HEIGHTS

**ski-doo**

**Hello  
2016!**

# Welcome to the 2016 Ski-Doo Riding Gear, Accessories and Genuine Parts Catalog

As you browse through the more than 180 pages, we hope that you will find the right product that will enhance your riding experience with your Ski-Doo snowmobile. Because we believe that the clothing you wear when you ride and the accessories you add to your snowmobile are critical to your snowmobiling experience, we are constantly pushing ourselves to create innovative and integrated products to satisfy your needs. You will see several new items in 2016 such as the tMotion Adjustable Limiter Strap, Helium Enduro Jacket or the women's version of the TEC + Boot.

We have also been pushing our clothing and accessories catalog the past few years, and the one you are holding is no exception. We want it to be more than page after page of small photos, part numbers and prices. We want it to become a reference guide to help you understand the items we have developed with your needs in mind. To do so, we have showcased detailed features, benefits and innovations for most

items to make your reading experience a great one! Here are also some of the new initiatives we have added to help you do just that:

## **RIDING GEAR PERFORMANCE RATINGS**

It can get confusing trying to sort out the different insulations, waterproof/breathable technologies, etc. With these unique and simple ratings, you will be able to easily understand which trail riding jacket, say, is the warmest or the most waterproof. They'll also help you choose the base layers and mid layers to create a system that will keep you warm for your riding style.

## **COMPARISON CHARTS**

Here, you can see an entire category's items on just one page. Get a quick glimpse at the style, materials, technologies, key features/benefits, BRP Performance Ratings and prices, all at a glance. Get a quick feel for the items, then turn to their respective pages to learn more and see all the options.

## **VIDEO LINKS**

For some of our more technical and popular items, we have developed in-depth videos giving you a tour and explaining their key benefits. If you're browsing on a computer or tablet, just click these links to watch. You can also view them all on [ski-doo.com/videos](http://ski-doo.com/videos) and our YouTube channel.

## **TECH ZONES**

Advanced technologies and designs make our riding gear and accessories stand above the rest. On these pages, you'll see what technologies we use and how they work.

## **DEVELOPMENT STORIES**

This year, we have a series of articles taking you inside our development processes. Where we get ideas, how products come to life, and what we consider before giving an item the "green light" for production.

## **EXPERT ADVICE**

We have articles to help you choose the best helmet type, guide you through our suspension upgrade options, what to factor in when considering track studs, and other helpful tips.

## **FUN, INSPIRING STUFF**

There are profiles of interesting riders from around the world, little snippets of interesting information (Innovations, Did You Knows), previews of consumer sleds in the works and more.

We hope you enjoy this catalog. We believe you deserve the ultimate riding experience.

Think Snow!

## GET THE RIGHT GEAR

Wearing gear for the type of riding you do will maximize your snowmobiling experience. Look for the icon that best matches your riding style:

**MOUNTAIN**

**CROSSOVER**

**TRAIL PERFORMANCE**

**TOURING**

**RECREATIONAL / UTILITY**

## LEARN MORE AT A GLANCE

Look for these icons throughout the catalog to learn a bit more about key products

**NEW**  
New item for 2016.

**DID YOU KNOW**  
An interesting tidbit about an item beyond the product description.

**INNOVATION**  
An item BRP pioneered that takes your ride to the next level.

# CREATE YOUR CLIMATE WITH THE BRP PERFORMANCE RATING

## Warmth

This rating considers all aspects of the garment, including insulation, waterproofness, windproofness, breathability and fabric construction. Use it as your main criteria.

## Waterproof/ Windproof

This rating reflects the technology used, sealed seams, zipper types and more.

## Breathability

This rating indicates how effectively perspiration is moved away from your body and out of the garment.

We designed this Performance Rating System so you can easily choose and compare riding gear to find the ideal combination of performance and value for how YOU ride. Each riding gear garment has 3 performance ratings. **Look for these in the item descriptions throughout the catalog.**

On a 1 to 5 scale, 5 is the highest.

## How to create your climate

Mix outer layers (jackets and pants), mid layers and base layers to create a level of warmth that matches your riding style and natural body temperature. First, consider your waterproof/windproof and breathability needs. **Then just add up the WARMTH rating of each garment in each layer to get your system warmth total — the higher the number, the warmer the system.**

When building your system, be sure to consider your:

- **RIDING STYLE** (active vs. relaxed)
- **RIDING ENVIRONMENT** (mild vs. extreme cold)
- **BODY TEMPERATURE** (do you run hot or chill easily?)

Examples of riding styles	Base Layer	Mid Layer	Outer Layer	Total Warmth Rating
<b>VERY ACTIVE MOUNTAIN RIDER</b>	 Active Base Layer ●	+  X-Team Microfleece ●●	+  Helium 50 Jacket ●●●	= <b>6</b>
<b>TOURING RIDER IN COLDER CONDITIONS</b>	 Thermal Base Layer ●●	+  Thermal Pants ●●	+  Voyager Highpants ●●●●	= <b>8</b>

### ADD FLEXIBILITY WITH LAYERING

No matter which outer layer you choose, the mid layer is where you can really adapt your climate to the conditions — even as they change throughout the day.

For an extreme cold snap, consider adding a Packable Down Jacket. You could even also add the Heated Vest Liner.

When it's mild and you're using a lot of energy, you might go with no mid layer at all, just a good base layer.

## 2016 Riding Gear Performance Ratings

### YOUR WARMTH RATING WORKSHEET

Use this space to create your ideal climate. Just fill in each layer's name and warmth rating and add them all up. When looking at combinations and total warmth ratings, be sure to consider your riding style, environment and body temperature.

Base Layer	Rating	+	Mid Layer	Rating	+	Outer layer	Rating	=	Total warmth
	<input type="text"/>	+		<input type="text"/>	+		<input type="text"/>	=	<input type="text"/>
	<input type="text"/>	+		<input type="text"/>	+		<input type="text"/>	=	<input type="text"/>

## MOUNTAIN

### Master the mountain.

Mountain riders and sleds can do things and go places we never imagined even a few years ago. And with new technologies, new materials and rider-centered designs, our mountain clothing has advanced right along with them. As you up your game, so do we.

# HELIUM 30 SERIES

The most innovative materials. Light weight. Easy movement.

Underarm and back venting

Removable knee and shin pads

All seams sealed

Highly windproof, waterproof and breathable membrane

Reinforced fabric at back seat and knees

SympaTex

SympaTex

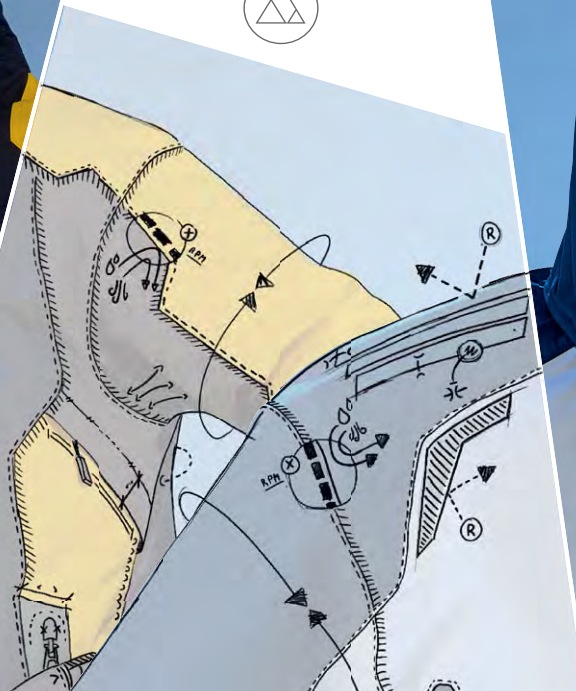

SympaTex

**FEATURES NOT SHOWN**

- Powder skirt
- High front and back bib panels
- Lightweight fleece and mesh inner liner

# TECH ZONE MOUNTAIN

## HELIUM 30\*

LIGHTWEIGHT AND TOUGH, YET HEAVY ON TECHNOLOGY.

Neoprene inner collar

Microfleece inner ply

Sympatex 2-Ply Laminated Polyester Cordura

Highly windproof, waterproof and breathable membrane

Water-resistant zipper at front opening

Reflective details

All seams sealed

Powder skirt

Adjustment at waist and hem

Velcro wrist adjustment

## TECHNOLOGY GUIDE

Sympatex membrane

Ski-Doo Riding Gear with Sympatex Lifetime Warranty

RECCO<sup>+</sup> Avalanche Rescue System

Laminated Polyester Cordura

A high-performance insulation with the full spectrum of benefits to brave the elements

Provides maximum warmth no matter how tough the ride or how cold the environment. All seams and logos sealed

Fit, Form, Function.  
Our Helium line features  
the most advanced patterns  
for the best performance.

\*Shown with Packable Down Jacket. Sold separately.

100% waterproof –  
non porous membrane  
will never quit

### Did You Know?

Gear with Sympatex doesn't have pores like other membranes and can be washed over and over without clogging or loss of performance.

Stretches to 300% of its size

Extremely  
durable  
and tough

Breathability will  
increase with heat  
and humidity

100% windproof – non porous,  
meaning that wind has no way  
of entering

All Helium gear uses the advanced Sympatex waterproof/windproof/ultrabreathable membrane that actually gets more breathable the harder you ride.

100% WATERPROOF

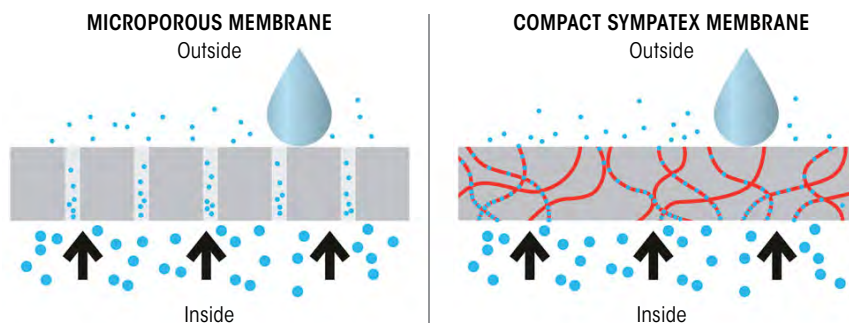

ULTRABREATHABLE

100% WINDPROOF

### COMPARISON OF WATER VAPOUR TRANSPORT

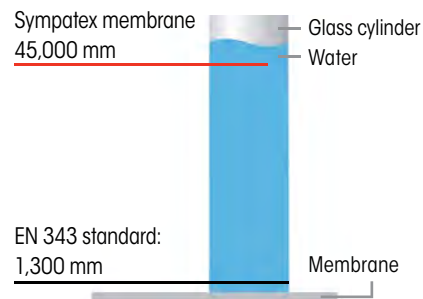

A membrane is waterproof  
if it can resist a pressure of

**1,300 mm**

Sympatex membrane is extremely  
waterproof since it can resist over

**45,000 mm**

**We believe so strongly in our Sympatex gear that we back it with a lifetime warranty.**  
Go to [www.store.ski-doo.com/warranty](http://www.store.ski-doo.com/warranty) for details.

#### WARRANTY COVERAGE PERIOD

Bombardier Recreational Products Inc. (BRP) warrants that all its 2016 Sympatex Riding Gear sold as New and Unused by an authorized North American BRP dealer will be free from any defect in material and / or workmanship for the lifetime of the product\*.

\* The lifetime of a product does not mean your lifetime. The intensity under which the product is used determines this factor. Rips, tears, punctures, holes and burns will void the product lifetime warranty even if the warranty issue is not related to these damages.

### HELIUM 30 JACKET

2 5 6

A radically lightweight and flexible jacket for the most active riders. Keeps you warm and dry thanks to Sympatex technology.

**Shell:** Sympatex 2-Ply Laminated Polyester

440576 • XS, S, M, L, XL, 2XL, 3XL  
White (01), Orange (12),  
Hi-Vis Yellow (26), Black (90)

**3 990 SEK**

### HELIUM PULLOVER JACKET

2 5 6

The most lightweight shell in our lineup, feels like wearing no shell at all. Innovative materials deliver breathability, performance and durability for mountain riding.

**Shell:** Sympatex 2-Ply Laminated Polyester

440666 • XS, S, M, L, XL, 2XL, 3XL  
Orange (12), Hi-Vis Yellow (26),  
Black (90)

**3 490 SEK**

The Sympatex membrane stretches to 300% of its size, so it maintains its properties in high bending areas, like elbows and knees.

N

**PACKABLE DOWN JACKET**

3 3 4

An ideal mid layer for active riders. Down insulation compresses to take very little room in your pack or storage compartment.

**Shell:** 90% Nylon, 10% Polyester  
**Insulation:** 50% PrimaLoft Ultrafine Fibers, 50% Water Repellent Down

440714 • S, M, L, XL, 2XL, 3XL  
 Black (90)

**1 890 SEK**

See the features of the new Packable Down Jacket.

Go to: [www.ski-doo.com/videos/gallery](http://www.ski-doo.com/videos/gallery)

Our Helium Highpants feature curved zippers on outer leg to prevent bunching of the material.

**HELIUM 30 HIGHPANTS**

2 5 5

Riding pants for active riders with Sympatex technology to protect you from wet and cold conditions. Our lightest, most flexible highpants.

**Shell:** Sympatex 2-Ply Laminated Polyester

441548 • XS, S, M, L, XL, 2XL, 3XL  
 Black (90)

**3 790 SEK**

### HELIUM 30 JACKET

2 5 5

Advanced technology and performance in a lightweight shell designed for women riders.

Shell: Sympatex 2-Ply Laminated Polyester

440695 • XS, S, M, L, XL, 2XL, 3XL  
Charcoal Grey (07)

**3 990 SEK**

### PACKABLE DOWN JACKET

3 3 4

An ideal mid layer for active riders, styled with a women's cut. Down insulation compresses to take very little room in your pack or storage compartment.

Shell: 90% Nylon, 10% Polyester

Insulation: 50% PrimaLoft Ultrafine Fibers,  
50% Water Repellent Down

440715 • XS, S, M, L, XL, 2XL, 3XL  
Black (90)

**1 890 SEK**

See the features of the new Packable Down Jacket.  
Go to: [www.ski-doo.com/videos/gallery](http://www.ski-doo.com/videos/gallery)

### HELIUM HIGHPANTS

3 5 5

Designed specifically for women. Feminine fit and super lightweight fabric. Waterproof, windproof and ultra breathable thanks to Sympatex technology.

Shell: Sympatex 3-Ply  
Laminated Polyester

SKI-DOO AMBASSADOR PROFILE:

# ASHLEY CHAFFIN

MCode Jacket and Pants  
XP-R2 Helmet  
Backcountry Gloves

2015 Freeride 146  
2015 Summit X 163 w/T3 package

"The versatility of the 3-in-1 jacket and the lightly insulated pants make the MCode my "go-to" gear."

## PASSION

The outdoors. From taking my dogs on a hike to riding sleds, having fun and going on new adventures is something that has always driven me. Snowmobiling's really turned into a year-round passion. I'm lucky enough to live in Alaska where we can ride for 7 months of the year, and then I spend most of the off-season training for the next one. I'm also passionate about sharing the sport, always trying to share what I've learned with other riders and get new people involved.

## RIDING

My favorite area is my hometown of Valdez after one of its signature 3-foot snowfalls. It's even better when you mix in sun with blue skies and deep untracked powder. The final piece is taking off from the parking lot with a group of good friends and not crossing another track all day long.

## RACING

I grew up racing both snocross and cross-country on the weekends with my dad. But once I got a little older and started riding the backcountry with friends, I was hooked on that.

## GEAR

The versatility of the 3-in-1 jacket and the lightly insulated pants make the MCode my "go-to" gear. I usually wear it as a shell when I'm riding during the day and then put the liner back in for those long cold rides back to the truck. Plus, I'm loving the latest colors!

## "NORMAL" JOB

I own two coffee shops in Valdez. Sacred Grounds is a drive-through in the middle of town and Klondike Coffee is a walk-up inside a grocery store. Being a business owner is challenging, but it gives me a flexible schedule during the winter to get out and ride as much as I can.

## MOST FUN ON A SLED EVER

Ha! That changes about 100 times every year. After every great day of riding, I'm usually thinking to myself that was the "most fun on a sled ever!" But then as soon as it snows, it seems like I'm right back out there having the "most fun on a sled" all over again!

SKI-DOO AMBASSADOR PROFILE:

# PATRIK NORDSTRÖM

LULEÅ, SWEDEN

"I ride wearing a Modular 3 Helmet, which suits me perfectly by being completely fog free in our cold climate."

Modular 3 Helmet  
Revy One-Piece Suit

2015 Summit X 163 w/T3 package  
2012 Freeride 137  
2007 Summit 600 SDI

"Powder surfing is probably the most fun you can have while still wearing clothes!"

## PREVIOUS PASSION

Cars and drag racing have always been great interests of mine. I drove and competed in drag racing for 15 years with different cars. I have also competed in off-road racing with my Jeep.

## CURRENT PASSION

Sled riding. The unbeatable feeling of freedom combined with the physical challenge is what drives me. Powder surfing is probably the most fun you can have while still wearing clothes!

## RIDING

Me and my family winter camp in Käbdalis in the north of Sweden, where there are wonderful backcountry freeriding possibilities. I also enjoy longer trips with my friends in the Swedish mountains. Vuoggatjålme, Kittelfjäll, Abisko and Riksgränsen are a few examples of where you'll find really great mountain riding opportunities for sleds.

## GEAR

I ride wearing a Modular 3 Helmet, which suits me perfectly by being completely fog free in our cold climate. The Revy One-Piece Suit gives me the feeling of freedom and mobility, and I avoid getting snow between the jacket and pants, which is great!

## "NORMAL" JOB

I am a servicing technician specialized in repairing wheel loaders, dump trucks and excavators on site.

## MOST FUN ON A SLED EVER

What I enjoy the most is when me and some friends ride once a year to a remote village called Nausta. There, we are treated with endless areas covered with untouched powder. Nothing beats this trip!

SKI-DOO AMBASSADOR PROFILE:

# DAVE NORONA

Helium 50 Jacket and Highpants  
Revy One-Piece Suit

2015 Summit X 174 w/T3 package  
2015 Summit X 163 w/T3 package

"I never thought I would be into a one-piece suit, but after trying the Revy, I'm hooked. It's light, warm, easy to move around in and has a ton of pockets for cameras and other important stuff. It just looks and feels awesome!"

## PREVIOUS PASSION

Racing. Everything from bikes and skis to surf skis and running.

## CURRENT PASSION

Sledding, sled skiing, trial bike riding, biking... anything that takes me way back into the backcountry. I love being in the outdoors, exploring new areas and just having a good time in the fresh snow.

## RIDING

To steal a line from Bret Rasmussen: "My favorite place to ride is where it dumped yesterday." And I'd add "with anyone who loves to have FUN!"

## RACING

I've done more than 400 adventure racing events worldwide over the past 18 years. Now I prefer my adventures at my own pace.

## GEAR

I never thought I would be into a one-piece suit, but after trying the Revy, I'm hooked. It's light, warm, easy to move around in and has a ton of pockets for cameras and other important stuff. It just looks and feels awesome! I also love the XP-R2 Carbon Helmet. It's super light, which makes a big difference after a long, satisfying day of riding deep pow.

## "NORMAL" JOB

I currently do activities and appearances for my sponsors, host bike races, do motivational speaking and team building – anything but a traditional job, it seems. I play for a living, something I'm grateful for.

## MOST FUN ON A SLED EVER

Most fun on a sled ever: Every time I go out into the backcountry, I have a blast! And because the Ski-Doo sleds get easier and more fun every year, I'm having more fun. I mean, with my Summit X 174 with T3, you pull a line you never thought you would make and look back... "WHAAAAT?!?!?!?" Now that's FUN!

## PRODUCT DEVELOPMENT

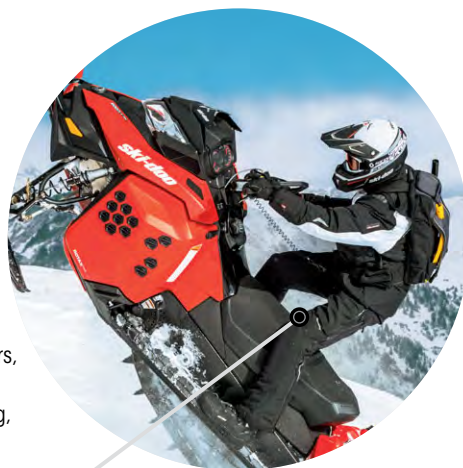

# INNOVATION TAKES MANY FORMS

## FIT

So much of your comfort depends on the fit of your garment. It's more than just "if it feels comfortable" (though that's key). You also need to be able to move how you want.

### PROPER FIT IS CRITICAL TO GETTING MAXIMUM WARMTH AND BREATHABILITY.

So we have been refining the fit of our gear with a "Fit, Form and Function" approach. Take the Helium 50 Highpants. We heard from riders, including Rob Alford and Carl Kuster, that they would bunch in certain areas and be hard to maneuver in. Our designers then spent time riding, observing and studying, and came up with a whole new ergonomic design featuring a unique curved side zipper. It fits perfectly on the leg, there's little bunching and the zipper is less exposed to snow and wind.

Fit, Form and Function Helium 50 Highpants

## DESIGN

Our passion dictates that there's almost always room to improve a design. Because there are a lot of choices out there, we really pushed ourselves to make the new TEC+ Boot different.

### We did that by insisting on snowmobile-specific features that would deliver a great riding experience — while also being versatile enough to wear every day.

Up front, you'll notice that the laces start further up the foot than a standard boot. That eliminates pressure points when you hook your foot into your sled's stirrups. It's also why there are no metal lace eyelets (this also prevents you from scratching your sled). The honeycomb pattern around the ankle area looks cool — and functionally speaking, the harder material acts like an exoskeleton, preventing scuffs and scratches while staying light and flexible.

Cool and functional honeycomb pattern

## MATERIALS

As snowmobiles have become more capable, riders have become more active (especially in the mountains), leading to our sport surpassing the effectiveness of the well-established waterproof/breathable technologies. To ensure you stay warm and dry, our team searched for alternatives that were totally waterproof and windproof, but more breathable.

That led us to Europe and the ultra lightweight/high performance **Sympatex membrane technology** that had gained a great reputation in their ski and outdoor industry. It debuted in our Helium mountain riding gear and because of its performance, we have spread the technology to trail riding and crossover gear. But we are not wed to a single technology — we use what's best to maximize each product's performance.

At BRP, innovation is core to our DNA. But what does that really mean, especially in the context of Ski-Doo Riding Gear?

Here are four ways where our quest for new solutions has made the snowmobiling experience better.

## CONCEPTS

Of course, it's not just details we are looking at — we take a big-picture view, too. We started the Modular Helmet revolution by rethinking the visor-fogging problem. The resulting snowmobile-specific Modular and BV2S Helmets and their wide, clear openings are some of the best-selling in the industry.

### And for 2016, we are creating a new segment in outerwear with the Enduro Jacket and Highpants.

Just like crossover sleds, they combine the best features of mountain gear (Sympatex breathability, added coverage, minimal styling) and trail performance gear (light, breathable insulation).

When you look at the riding gear in the snowmobile industry, you can bet that you'll see innovation in all four of these areas and that Ski-Doo will be out front — ensuring you have a great snowmobiling experience.

For instance, we recently adopted OutDry waterproof/breathable technology for the Backcountry and Highmark Gloves. It's specific to gloves and footwear and delivers feel like nothing else.

N Highmark short-cuff Gloves

N Helium 30 Highpants

## CROSSOVER

**Versatility for however and wherever you ride.**

Crossover riding is active, but in colder climates. So just like our crossover sleds, we took the best features and technology from our mountain and trail riding gear to create a whole new category.

### HELIUM ENDURO JACKET

3 5 5

Ultra high performance jacket with mid-weight insulation to keep you warm and dry, whether you're carving up trails or exploring the woods.

- Sympatex waterproof/windproof/breathable technology.
- All seams sealed.
- Water-resistant zippers at front, pockets and vents.
- Microfleece inner collar.
- Easy-to-reach bicep vents.
- Powder skirt.
- Hem, collar and wrist adjustments.
- Inner microfleece cuffs.
- Silicone grips at shoulder to stabilize a backpack.
- Wide reflective features for better visibility.
- Reinforced elbows and back hem for durability.

**Shell:** Sympatex 2-Ply Laminated Polyester, Cordura  
**Insulation:** PrimaLoft Black

440713 • XS, S, M, L, XL, 2XL, 3XL  
Charcoal Grey (07)

## PRODUCT DEVELOPMENT

# LEADING WHILE LISTENING

Sure, our clothing and accessory developers are heavily involved in, and passionate about, snowmobiling. But we always seek new ideas and unique solutions to every condition. So we do a lot of listening. To consumers like you, dealers, and other experts.

We get great ideas for new items to develop. And real world feedback on how to improve an item – both before it's released and after it's in your hands.

Listening to so many people in so many places with so many different perspectives enables us to continue delivering products that enhance your snowmobiling experience.

Here are some of the people and places with an ear to the ground at all times:

### DEALERS

No one is closer to riders than our dealers, so we are constantly soliciting their advice and counsel. We often bring a handful of dealers together to show future items and get their reactions.

### FOCUS GROUPS

Sometimes we really jump inside snowmobilers' minds on a new concept or product before bringing it to market, so we get a bunch of them together and ask for reactions.

### OWNERS' SURVEY

When this comes in the mail, be sure to complete and return it! Your answers here are shared between the sled and riding gear marketing departments and can influence future trends, products and priorities.

### ONLINE FORUMS/SOCIAL MEDIA

Yes, we are out there reading what you have to say on the top forums and our Facebook pages. The past few seasons, we have received helpful feedback on a popular online forum on key items from the Gear Tester program.

### ENGINEERING STAFF

Heading out and riding — often for days or weeks at a time — is their job, so they really understand what's great about a product or what can be improved.

### EXPERT RIDERS/RIDING CAMPS

We have a collection of expert riders we trust and ask for feedback and suggestions on current and future gear and accessories. Each offers a different perspective. For instance, Carl Kuster and his team outfit dozens of riders at his CKMP camp rides each winter. Ashley Chaffin gives us a young, female point of view. Dave Norona has relationships with a wide variety of outdoor gear companies, from skiing to mountain biking to hiking.

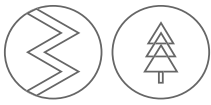

### RACE TEAMS

Racers are great testers for us because pushing themselves, their sleds and their gear to the absolute limits is what they're all about. And every discipline has something to offer. Snocross racers are active, needing breathability and waterproof protection. Cross-country racers, like in the Iron Dog race, face bone-chilling colds on high speed straightaways.

### SNOWMOBILE SHOWS

We have several people who attend shows to talk to you about accessories and clothing. They take your suggestions and comments, and share them with our development teams. This process has been magnified by the Knowledge Centre truck that we had at several shows. And at the 2013 Hay Days event, we had our ergonomics experts measuring hundreds of riders' heads to fine tune future helmet fits.

## RECREATIONAL / UTILITY

**Gear that works or plays as hard as you do.**

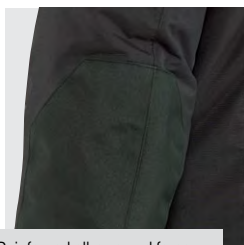

You want – no, you demand – great value from your gear. Look no further, because our Recreational and Utility collections combine our unmatched experience in designing snowmobile-specific gear with a commitment to great value.

# EXPEDITION SERIES

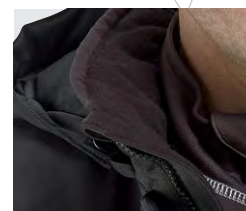

Rugged style with great value.

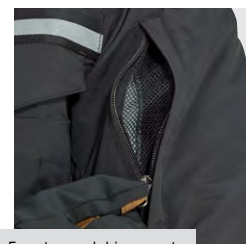

Reinforced elbows and forearm

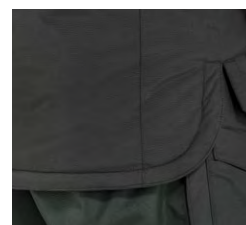

Fleece-lined seat

Microfleece inner neck and sleeve cuff

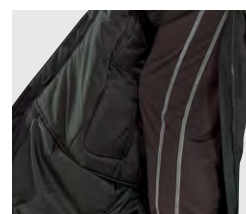

Easy-to-reach bicep vents

Parka length for warmth with side slits

9 multi-purpose pockets

Reinforcements at seat and inside knees

## FEATURES NOT SHOWN

- Teflon coating for soil proof
- Adjustable collar and wrist

### EXPEDITION JACKET

4 3 3

A full-featured jacket that's ready to work - or play - as hard as you do. Parka length for warmth with 9 pockets and reflective webbing.

- Parka length for warmth.
- Side slits.
- Teflon coating.
- Two insulated front zipper flaps.
- Powder skirt.
- Reinforced elbows and forearm.
- Easy-to-reach bicep vents.
- Adjustable collar and wrist.
- Microfleece inner neck and sleeve cuff.
- Detachable hood.
- Critical seams sealed.

## TECHNICAL WEAR

### What's under the shell counts

To keep warm, you've got to keep dry. Our technical base and mid layers wick perspiration away from your skin where it can evaporate quickly for all-day warmth.

## TECH ZONE

### TECHNICAL WEAR

### HOW IT WORKS

Each layer has a function. You get the best performance and versatility when you dress in a system with base layer, mid layer and outer layer.

#### OUTER LAYER

Keeps wind and water out.  
Adds insulation for warmth.

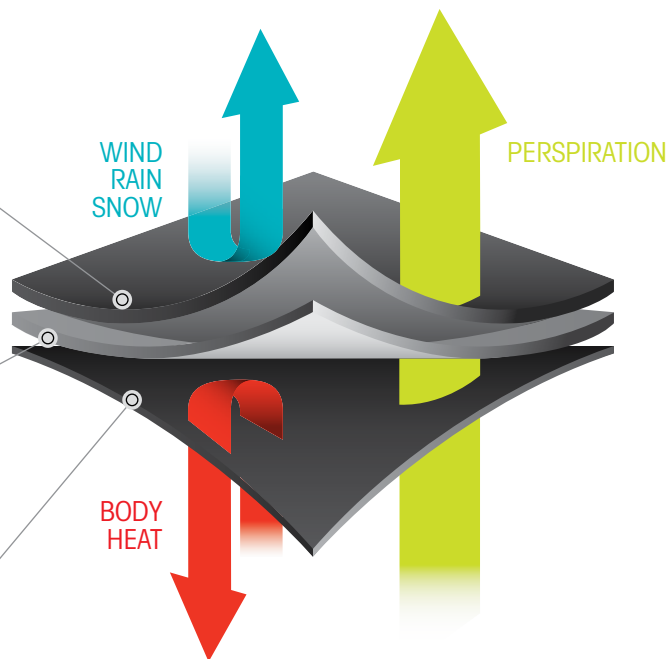

#### MID LAYER

Dials in your warmth level.  
Add or remove during the day as conditions change.

#### BASE LAYER

Close to the body to wick perspiration and prevent chills.  
Adds warmth. Avoid cotton — it gets wet and stays wet.

#### Did You Know?

Cotton doesn't breathe, trapping moisture against your skin and causing you to feel cold and wet. High performance base layers allow moisture through, keeping you dry and warm.

### CREATE YOUR OWN CLIMATE

The combination of base layer, mid layer and outer layer works together to keep you warm and comfortable. Select and combine each to create your own climate for how you ride. For instance:

#### ACTIVE MOUNTAIN RIDER

Needs highly breathable gear to let perspiration escape.

#### ACTIVE TRAIL RIDER

Needs breathability with a bit more insulation, especially in colder climates.

#### LONG DISTANCE CRUISER

Needs more thermal gear with added insulation.

We've made it easy to choose just the right gear. Look for these ratings with each layer. You can even add the warmth ratings of different layers together for an overall system rating. **Learn more about our climate rating system on pages 4-5**

- WARMTH
- WATERPROOF / WINDPROOF

**FEATURES**

- Weighs only: +/- 1200 g for size Large.
- Tool-less multi-adjustable front peak with anti-reflecting underside.
- Flexible face trim design with a large nose protector area.
- F.A.S. (Full Air System) with 10 ventilation points and double rear extractor.
- Integrated rear fin.
- Integrated goggle anti-slip design.
- Multi density EPS foam inner shell.
- Removable and washable inner liner and cheek pads.
- Liner features sanitized treatment.
- Front top pocket for sweat absorbing pads.
- Morpho System Plus - Ergonomic 3D cheek pads.
- Double D racing buckle.
- Aluminum screws, protective coated parts.
- Helmet bag.
- D.O.T. and ECE 22.05 certified.

**BENEFITS**

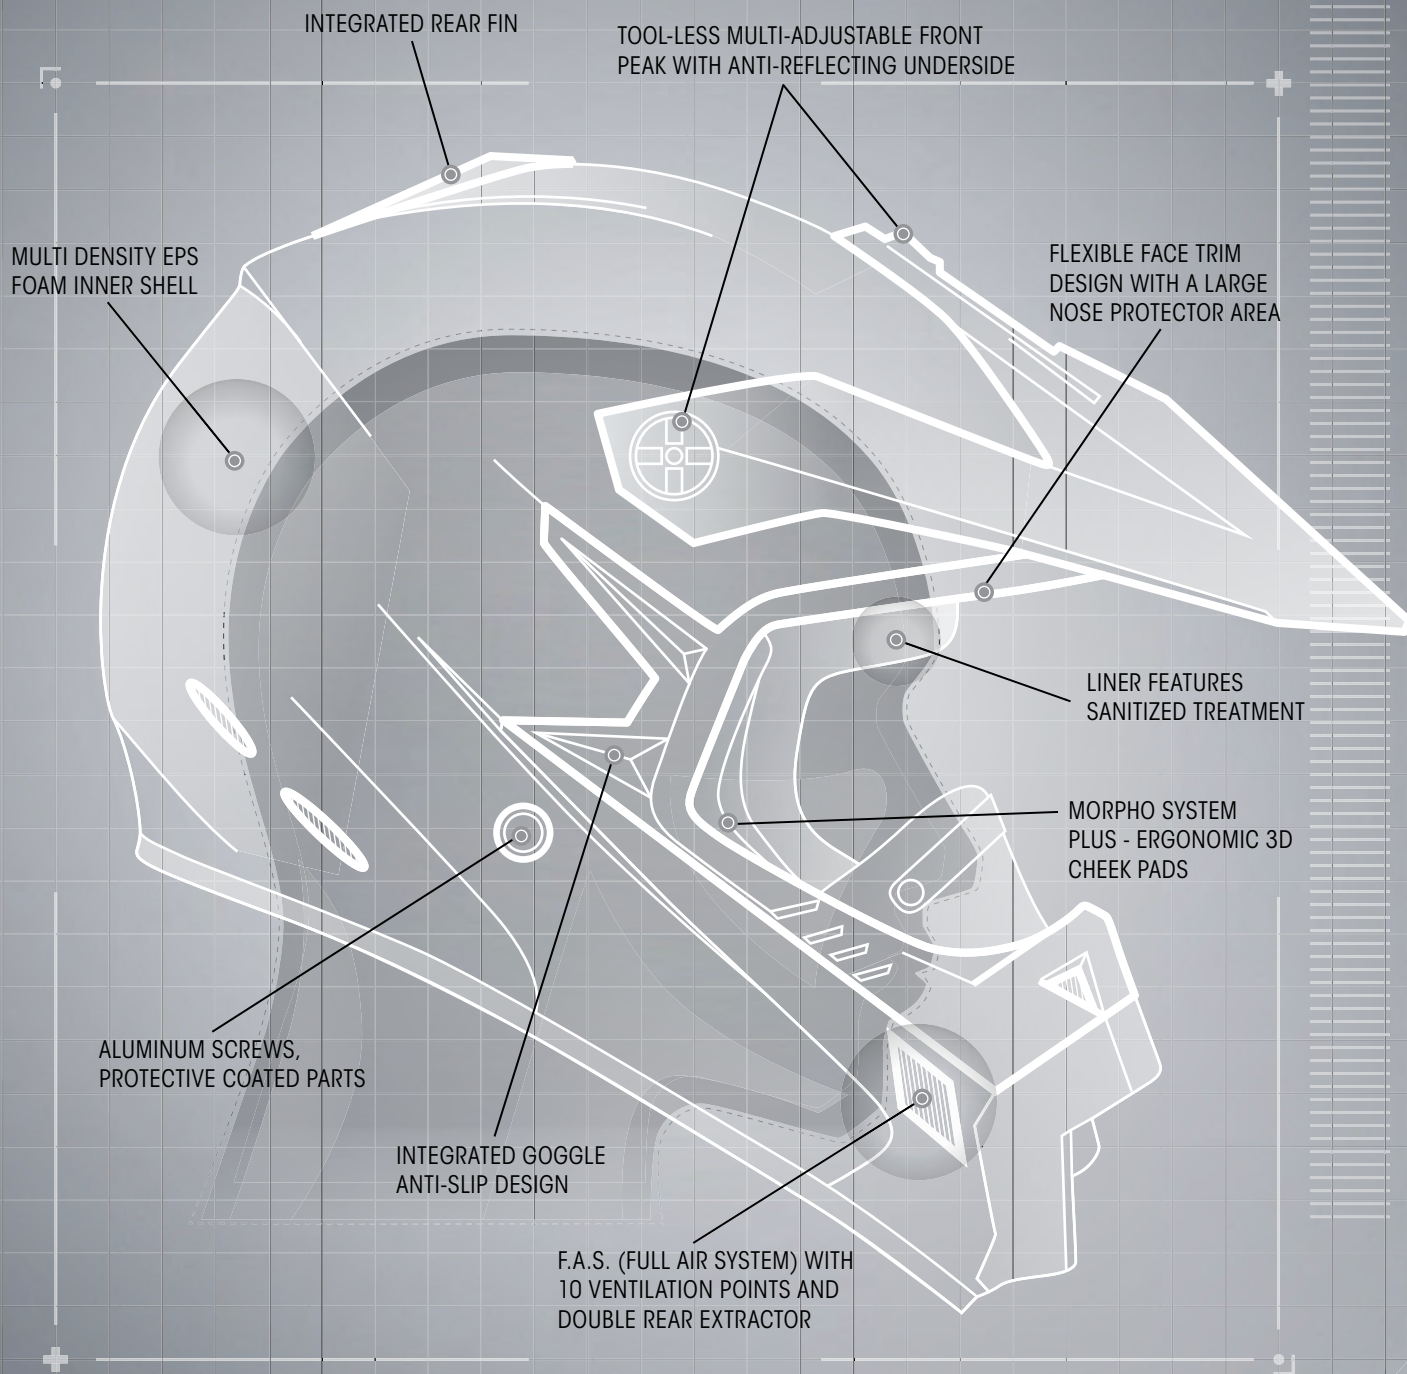

- ▶ Less stress on neck and shoulder muscles.
- ▶ Allows quick visor adjustment and reduces glare.
- ▶ Protects from wind and snow.
- ▶ Allows you to control airflow for cooling.
- ▶ Added stability and aerodynamic performance.
- ▶ Superior protection over single-density foams.
- ▶ Keeps your helmet fresh.
- ▶ Promotes wicking of moisture.
- ▶ Allows for a better fit.
- ▶ Most secure fastening method.
- ▶ Assures lasting appearance.

- Superlight polycarbonate shell.
- EPS inner shell.
- Front and rear vent system to keep you cool.
- Custom stainless steel front vent design.
- Fully-adjustable visor system.
- Removable, washable and replaceable moisture-wicking liner.
- Winter breath deflector.
- Goggle strap grip.
- Lightweight double-D chin strap.
- ±1470 grams in size Large.
- Meets or exceeds SNELL M2015 and D.O.T. certifications.

- ▶ Less stress on neck and shoulder muscles.
- ▶ Impact absorbing protection.
- ▶ Allows you to control airflow for cooling.
- ▶ Added stability and aerodynamic performance.
- ▶ Keeps your helmet fresh.
- ▶ For warmth on cold days.
- ▶ Most secure fastening method.

# THE DIFFERENCE IS THE DETAILS

YES, OUR XP-R2 CARBON LIGHT HELMETS ARE AMONG THE INDUSTRY'S LIGHTEST. BUT THERE'S SO MUCH MORE TO THEM - WE WORKED TO MAKE EVERY ELEMENT COMFORTABLE, FUNCTIONAL AND HANDSOME.

# CHOOSING THE BEST HELMET

When it's time for a new helmet, choosing one that meets your needs and your riding style is crucial so you get the most from your riding. It shouldn't be about what your friend or everyone else is wearing, or even the style you last wore – helmets have changed and maybe you have, too.

Some people actually need two helmets because the conditions or locations of their rides vary greatly. Take the time to really assess what you need from your helmet and make a decision based on the attributes you decide on.

## TODAY'S HELMETS COME IN FOUR STYLES

### OPEN FACE

¾ style with no front chin or facial protection

### SNOCROSS

Sometimes mistakenly called "open face"

### FULL FACE

Fixed jaw section with visor

### MODULAR

Ability to lift/open the jaw section as well as the visor

## SO WHICH FEATURES ARE MOST IMPORTANT TO YOU?

If you do a lot of trail riding and ride in very cold areas, look first at a Full Face or Modular helmet. Its full coverage, sealed design will keep you warm on those frigid days (made even colder by the higher speeds on trails) while also providing great vision. With the Modular style helmet, especially our Modular 3 and BV2S models, you can easily stop and talk with your riding group or grab a quick drink or snack. It's also more comfortable getting the helmet on and off.

For warmer riding conditions and more active riding, you might opt for a Snocross helmet with goggles. In highly active riding where you will be sweating and breathing hard – like most mountain rides – goggles are the best solution for clear vision, and the more open area helps keep you from overheating. If this is your choice, bring an extra set of goggles so if the first ones fog up, you have a spare set. Store the extra set in the Oil Support Caddy/Goggle Bag p.148 and they'll clear up with the under-hood heat. Rotating two sets means you'll always have clear vision.

## WHAT STYLE IS BEST FOR...

### MAXIMUM WARMTH

Full Face,  
Modular

### MAXIMUM VISIBILITY

Modular, some Snocross  
when paired with high  
quality dual-lens goggles

### MAXIMUM FOG PREVENTION

Modular

### MAXIMUM VERSATILITY

Modular

### LIGHTEST WEIGHT

Snocross

### HIGHLY ACTIVE RIDERS

Snocross

### HAVING A CONVERSATION, DRINKING OR EATING

Modular

# HOW TO MEASURE

- For best results, have someone else take measurements.
- Measure body in underwear.
- Tape must be snug but not tight.
- If measurements fall between two sizes, order the larger size.

**Height:** without shoes, standing with heels and back against a wall.

**Head:** around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

**Arm length:** let the hands hang down on the side in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.

**Chest:** measure under your arm, around the fullest part of your chest.

**Waist:** immediately below the lowest rib.

**Hips:** across the fullest part of the seat.

**Inseam:** without shoes, from crotch to the floor.

## PRODUCT DEVELOPMENT

# PARTNERSHIP FOR SUCCESS

Developing accessories for your Ski-Doo snowmobile is a thorough, well-thought-out process that starts at the same time a new platform is developed. The process delivers a final product with perfect integration and same quality fit and finish as the rest of your snowmobile.

## IDEATION

This is where the real fun is at — coming up with ideas on accessories to develop. Several times a year, our triad team of Marketing, Design and Engineering gathers to propose and discuss possibilities for accessories (we also look at what worked and didn't work the previous seasons). The team has deep roots in snowmobiles of course, but also ATVs, roadsters, watercraft, road and dirt motorcycles, automobiles, and more. We also include the vehicle teams, as well.

**It's this diversity that enables us to consider so many creative ideas.**

The team is constantly absorbing trends, concepts, technologies, irritants and more by going to shows, cruising online forums, talking to dealers. But most importantly, riding. Our passion drives our success.

## EVALUATION

We always come out of these idea generation meetings excited and with a long, long list of possibilities. But now we have to narrow it down. We look at past market successes, future trends, game-changing ideas, development time and costs, the potential market, the competitive landscape and more. Some items are greenlit, others put on the shelf, and of course, some end up in the dust bin. Sometimes we even debate on whether an item should be standard on vehicles or an accessory.

**When debuting a new platform, we always prioritize items that are first-year must-haves, like skid plates, alternate windshields and storage.**

We also push to add some innovative or revolutionary solutions. And we look to addressing things consumers have said could be better. Other items are put on a timeline for introduction at a later date.

## DESIGN/ENGINEERING

No matter the item, it must meet the same durability, reliability and quality standards as our vehicles — you expect this. It also must be:

- **FULLY INTEGRATED WITH THE VEHICLE**
- **EASY TO USE**
- **EASY TO INSTALL**
- **PERFECTLY COLOR MATCHED TO THE VEHICLE**

This is where we feel we have a great advantage because our accessory development teams are closely integrated with the vehicle development teams. The designs all come from the same CAD files for a perfect fit; the items can be made with the same materials and suppliers and color codes; all the testing protocols are in place. Plus, it makes installation so easy! Sleds come from the factory with holes already perfectly placed or marked for LinQ cleats,

skid plates, glove box extensions, 1+1 seats and side panel vents. On REV-XM and REV-XS sleds, the headlight and hood are even shaped to accept the LED Auxiliary Light.

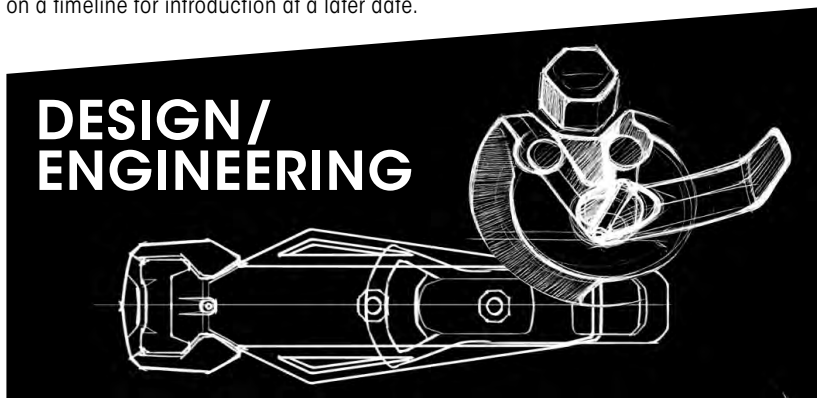

From design, prototypes are built with the latest technologies in rapid prototyping. The key here is to just evaluate the idea. After modifications are made, we move to a second round of prototypes to get a finished look, fit and feel. Wiring harnesses or special fasteners are designed, then it's back into the field for validation.

**Now it's time for rigorous durability and weather simulation testing before approval to go to market. Accessories must pass the same testing protocols as our vehicles.**

While all this is happening, other teams are writing installation instructions, developing packaging and shipping containers.

## TEAMWORK

Central to this process' success is teamwork, between functional departments, between brands, between vehicles and accessories. The very successful LinQ system came to being because of the partnership between Can-Am Off-Road and Ski-Doo. Item-vehicle integration is so tight and installation so easy because of the synergy between accessories and vehicles.

# THEY TOOK THEIR SLEDS TO THE NEXT LEVEL

**Jon Sindorf / Palmer, Alaska**  
Sled: 2015 Renegade X

My dad Paul and I are racing the Iron Dog cross-country race, and we need to add a lot of items so that we — and our sleds — survive the 2,000+ miles race and our training runs. We chose BRP accessories because they fit right and we know we can depend on them.

**Accessories added:**

- Full Body Skid Plate
- High Sport Performance Flared Windshield
- Glove Box Extension
- Montana GPS
- 12V Accessory Plug
- Handlebar Muffs
- Tank Bag
- Handlebar Bag
- KYB PRO 40 Shocks
- Heavy-Duty Springs
- Extra Limiter Strap
- Auxiliary LED Light
- Heavy-Duty Rear Bumper
- XC Front Bumper
- Running Board Mounted Scratchers
- Tunnel Protectors
- Recoil Starter
- Woody's Phantom Sharp Studs
- Extra Carbide Runners
- Short 10L and Medium 19L LinQ Tunnel Bags

**Fredrik Jonsson**  
Vilhelmina, Sweden  
Sled: 2014 Renegade Backcountry X

I love to ride off-trail and I wanted to make my sled a little more suitable for deep powder riding. I chose BRP accessories because they have the same great quality and fit and finish as the sled. They're easy to put on and add great features to my Renegade.

**Accessories added:**

- Extreme Skid Plate
- Sway Bar Quick Disconnect
- Adjustable Riser
- Summit X Seat
- LinQ Cleats
- LinQ Tunnel Backpack
- Summit/Freeride Flat Gauge Support
- Prefilter Grille Kit

**Chris Meier / Manorville, NY**  
Sled: 2014 Renegade X

I've been doing more off-trail stand-up riding, so the adjustable riser, skid plate and tunnel braces work for that. But I also do some longer trips, so I go for comfort items, too, like the LinQ system. I love how easily they come on and off the sled to carry them into the hotel with you each night.

I chose BRP accessories because they make it easy on you. They are a snap to install, and the fit and finish are unmatched.

**Beavan "Beavo" Sara**  
Fernie, British Columbia  
Sled: 2014 Summit X 163  
"The Nimble Locomotive"

I've chosen most of my accessories for comfort, to save my energy and protect my sled. The more my sled can carry, the less I have to — so I can ride longer. I love how the BRP accessories just blend in with the sled and how easy they are to install. Like the plug-and-play prefilter vents — there are premarked holes in the sled and then the vent covers just snap into place.

**Accessories added:**

- S Module Brace
- Full Body Skid Plate
- Adjustable Riser
- Sway Bar Disconnect
- Small Riser Bag
- Extreme Seat Bag
- Goggle/Oil Caddy
- 12V Accessory Outlet
- Rail Scratchers
- Side Panel Vent Kit
- Prefilter Kit
- Rail Stiffening Kit
- Glovebox Liner

**Accessories added:**

- Auxiliary LED Light
- Pilot DS2 Skis
- Full Body Skid Plate
- Adjustable Riser
- Small Handlebar Riser Bag
- Handlebar Muffs
- Glovebox Extension with Glovebox Liner
- Montana GPS
- Goggle/Oil Caddy
- LinQ Medium Bag
- LinQ Fuel Caddy
- LinQ Saddlebags
- Tunnel Braces
- Handlebar Air Deflector Extension
- Heated Visor Kit
- 12V Accessory Plug

"Love the LinQ stuff. It's secure, quick and convenient. Ski-Doo really has the total experience nailed versus everyone else."

— A7M266D

**LinQ accessories are awesome. But why just take our word for it?**

Here is what some doo talkers had to say about LinQ accessories.

## **LinQ** SYSTEM™

**FAST** Instantly "plug in" accessories

**EASY** No tools required

**SECURE** Full-lock mechanism

**UNIQUE** to Ski-Doo

▶ Watch how fast and easy the LinQ system is.  
Go to: [www.ski-doo.com/videos/gallery](http://www.ski-doo.com/videos/gallery)

"It's the best in the industry, period. I never rode with a bag ever, before the LinQ system came out."

— cmracer

**"They work great.  
You don't even  
notice them when  
riding, and they're  
quick and easy to  
put on and take off."  
— mrjd**

**"We use the medium bag  
and fuel caddy on our Renegades  
and absolutely love them."  
— tpilot**

## WORK. PLAY. EXPLORE. ENJOY.

The **LinQ system** is a full-lock mounting system delivering an easy, fast and secure way to attach accessories to your sled. Now you can transform your sled instantly.

# WHAT PLUG- AND-PLAY MEANS TO YOU

When you develop sleds and accessories together, it means the accessory is easy to install, easy to use and perfectly integrated into your sled. We often refer to accessories as Plug-and-Play, which means when you add an electrical accessory, the wiring is the right length and the harness is ready to accept it, with no splicing. It means that if you need to drill a hole, it's already marked for you. Here are some examples of this unmatched integration.

## LED AUXILIARY LIGHT

Every REV-XS and REV-XM wiring harness has an automotive-style water-tight connector for powering auxiliary devices. The electrical system is designed so that the light fires with the high-beam switch. And the light's attachment points are molded into the hood.

## GLOVE BOX EXTENSION + GARMIN MONTANA GPS

The attachment points for the extension are molded into the glove box of all REV-XS and REV-XM sleds. And the wiring harness is ready to accept the GPS charging system – just plug-in the high quality connectors.

## SIDE PANEL VENTS

Our engineers have determined the optimal placement of the vents and these locations are marked on the inside of every sled's panels with small molded icons for a clean installation.

## LinQ SYSTEM

LinQ mounting holes are drilled into the tunnel and covered by a decal at the factory. Installation only requires piercing the decal and bolting the cleats on with simple hand tools.

## 1+1 SEAT + BACKREST

The holes for mounting the backrest attachment are subtly marked on the tunnel during manufacturing. No guessing when drilling.

## SKID PLATES

Rivet locations are all already punched out of the aluminum chassis.

## ADDITIONAL GAUGE FEATURES

It's possible to add additional features to your gauge cluster by simply plugging a sensor module into the electrical harness.

# WHAT'S YOUR TYPE?

The perfect windshield is the ideal mix of protection and style. This chart will help you easily choose your ideal match.

Ultra High  
(60 cm)

Extra High  
(51 cm)

High

### AUXILIARY LED LIGHT

- An industry first: accessory lighting.
- Designed with the sled for an integrated style, plus simple plug-and-play hook-up.
- Three-position OFF-ON-HI switch gives you the option of riding with your lights off, always on or only when switching to your high beams.
- A complete 10 LED lamp providing over 2100 additional lumens.
- Securely attaches below the stock headlamp, providing an intense, super-wide foglight-type pattern.
- Say goodbye to sacrificing close range lighting when switching to high beams.

**REV-XM, REV-XS, except Expedition Sport**

860201235

**2 690 SEK**

The Auxiliary LED Light not only increases brightness, it also widens the illumination field.

## ADJUSTABLE RISERS

- Instantly modify your handlebar height to adapt to changing riding conditions.
- Utilize the lower position for trail / sit down riding; extend to maximum height in seconds for stand up riding.
- Works with all stock cables and wiring.
- No tools required to make the adjustment. Just flip the lever.

### ADJUSTABLE RISER FOR STRAIGHT HANDLEBAR

- Adjustable length: 130 mm to 205 mm high.

Fits Renegade Backcountry (2011 and up) with 160 mm riser block

**860201123 • Black/Aluminum**

- Adjustable length: 120 mm to 160 mm high.

Fits MXZ and Renegade with 115 mm or 130 mm stock riser 2013 and up.

Requires steering pad (506152541) for MXZ and Renegade X-RS

**860201204 • Black/Aluminum**

- Adjustable length: 185 mm to 250 mm high.

Fits Summit SP, REV-XU Skandic - Vehicles with 205 mm riser block

**860201124 • Black/Aluminum**

**1 990 SEK**

860201204

860201124

Simple, lightweight, solid and adjustable in a wide range of positions.

### ADJUSTABLE RISER FOR TAPERED HANDLEBAR

- Adjustable length: 115 mm to 175 mm high.
- For REV-XP platform; requires steering pad (506152717) (not included).

Summit X & Freeride\* - Vehicles with 130 mm riser block

**860201125 • Black/Aluminum**

**1 990 SEK**

Adjusting riser height is easy as flipping a lever. Check it out. Go to: [www.ski-doo.com/videos/gallery](http://www.ski-doo.com/videos/gallery)

### EXTENSION KIT FOR STRAIGHT HANDLEBAR

- Adjustable handlebar extension kit to fit all riding styles.
- Works with all stock wiring and cables.

Fits Renegade Backcountry (2011 and up) with 160 mm riser block

**860200821 • 205 mm**

Fits Summit SP, REV-XU Skandic - Vehicles with 205 mm riser block

**860200822 • 250 mm**

**790 SEK**

REV-XS, REV-XR, REV-XP, REV-XU Tundra

**860200819 • MXZ 115 mm**

**790 SEK**

**860200820 • MXZ 160 mm**

**790 SEK**

### EXTENSION KIT FOR TAPERED HANDLEBAR\*

- 175 mm extension.
- 45 mm higher than stock extension.
- Works with all stock wiring and cables (except Freeride 2011).

Summit X & Freeride - Vehicles with 130 mm riser block

**860200758 • Black**

**790 SEK**

REV-XP Freeride 2011 and up, Summit X 2012 and up

**860200818 • Aluminum**

**790 SEK**

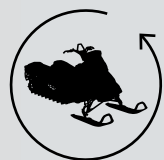

\*Brake line (507032535) required for Freeride 2011 only. To be ordered separately.

# BRING YOUR STYLE TO THE SNOW WITH THE ONLY SLED WRAPS ENDORSED BY BRP

FLARE

BERNER

SCRIBBLE

NOMAD

KATANA

STINGER

SCS has led the industry with fresh looks that complement both sleds and riders. With designs from wild to mild, they can give your new – or older – sled a look all its own. Especially when you consider how they can customize an existing design with colors and logos, and even create a design you come up with.

The wraps are of the highest quality – 4 mil vinyl overlaid with an 8 mil UV protective laminate. You get bright vibrant colors that hold up to both the rigors of snowmobiling and harsh weather conditions.

Available at participating Ski-Doo dealers and [www.scsskidoowraps.com](http://www.scsskidoowraps.com)

# MEET A PROFESSIONAL FISHERMAN HOOKED ON SKI-DOO

Erkki Jokiniemi / Profession: Fisherman

Sled: Skandic WT 600 ACE 2013 — 4,970 mi / 8,000 km with no issues

## HOW DID YOU GET INTO FISHING PROFESSIONALLY?

I've loved fishing ever since I was a kid, so when I quit farming, fishing was a career choice that came quite naturally. You could say a hobby turned into a profession, and I've been on this path for almost two decades. I fish for mostly perch and pike, and whitefish during the winter, on two large reservoir lakes, Lokka and Porttipahta. The area is located in Sodankylä, in Finnish Lapland, over 62 mi / 100 km north of the Arctic Circle.

## WHAT IS YOUR TYPICAL DAY LIKE IN THE WINTER?

Three or four days a week, I will go to the lake around 9 am, and return around 3 or 4 pm. But my working day is far from over — I still have the gutting and filleting to do until late in the evening.

## WHY DID YOU CHOOSE THE SKANDIC WT?

My previous sled — which was NOT a BRP sled — started acting up on the lake, and I called a friend of mine to help me out. He arrived on his Skandic, and I asked to try it. I was sold immediately and knew for sure that this would be my next sled.

## WHAT DO YOU ESPECIALLY LIKE ABOUT IT?

The Ski-Doo Skandic is made especially for work use. The Synchronmesh transmission makes it possible to ride very slowly when necessary. The open tunnel does not gather snow. What has convinced me most has been the operational reliability of the sled: even in weather around -13 °F / -25 °C, it starts so easily. The machine must have torque and power, which is needed when there's water and slush on the ice making it really difficult to get forward.

The Rotax 600 ACE engine doesn't smoke and has excellent fuel economy. The fuel consumption is so low that sometimes I almost forget the sled even needs refueling! After acquiring the Skandic, I have become

somewhat of a Ski-Doo ambassador, and now quite many of my acquaintances have gotten themselves a Skandic.

## HOW IMPORTANT IS THE SKANDIC TO YOUR JOB?

You simply couldn't do this job without a proper sled. I've had my Skandic for two years now, and it has 4,970 mi / 8,000 km on it, all from riding on ice. The lakes are frozen from the beginning of November until the end of April. This year, in just two months, I have logged 1,600 kilometers.

## WHAT SKI-DOO/BRP ACCESSORIES HAVE YOU ADDED TO YOUR SKANDIC?

The most important is the winch. I'm on the lake by myself, so I have to be able to pull the sled out if it gets stuck. In winter in Lapland, it is dark even during the day, so effective extra LED lights are necessary.

## WHY DID YOU CHOOSE SKI-DOO/BRP ACCESSORIES?

I can rely on them even in the harsh arctic conditions. I've always thought that the less money you have, the more important it is to spend it on quality!

## WHAT WAS THE TOUGHEST DAY YOU HAD OUT FISHING? WHY?

There have been plenty of those, like one spring day, when I was forced to make 0.2 mi / 300 meter long trail by shoveling icy slush to the side. I had my wife with me, and since that day she's preferred staying home. The Skandic is my thirteenth sled and my first Ski-Doo. I have to say that with my previous sleds, I got into difficult situations quite often, but not even once since I got my Skandic.

## WHAT IS THE BEST DAY OUT FISHING LIKE?

The best are the beautiful spring days, when the snow is glistening with sunshine. Fishing gives you a great adrenaline rush anyway, but in those kinds of days, it feels especially great. And of course, catching a lot of fish really makes my day!

# LinQ 1 + 1 COMPLETE SEAT SYSTEM

## LinQ 1 + 1 COMPLETE SEAT SYSTEM\*

- The ultimate in modular seating.
- Allows quick changes between 1-up and 2-up riding.
- Ergonomically correct positions for driver and passenger.
- Two easy tool-less steps:
  - 1- Clip in seat.
  - 2- Add LinQ 1 + 1 Backrest.

REV-XM, REV-XS, REV-XP & REV-XR (except GTX, Grand Touring), REV-XU Tundra

## SKI-DOO BY *woody's* Carbides

### CARBIDE RUNNER

- The Dooly<sup>®</sup> by Woody's has two 7/16" Flat-top<sup>®</sup> runners mounted on a plate for each ski.
- Four contact lines on snow surface help decrease darting of sled as it makes own groove in a trail.
- When in a turn, only one of the Dooly bars is in contact with the snow or ice.
- A Dooly with 4", 6" or 8" of carbide on both runners provides the same turning power as a single runner with 4", 6" or 8" of turning carbide.
- Sold individually.

Pilot Skis, except DS & DS-2

#### Did You Know?

The Articulated Rear Suspension is inspired by the go-anywhere performance of the SC-5U on Skandic, Tundra and Expedition sleds.

Watch the new Articulated Rear Suspension in action. Go to: [www.ski-doo.com/videos/gallery](http://www.ski-doo.com/videos/gallery)

# UPGRADE YOUR RIDE'S SUSPENSION AND HANDLING

Using genuine BRP parts to update, refresh and improve your Ski-Doo sled ensures they fit and perform perfectly, because they were designed and built by the same engineers that created your sled. Take a look at some of the ways to push a new sled further or refresh an older model.

## SKIS

Trail riders often experience constantly changing conditions (over one or several days) caused by temperature, traffic and snow depth, so engineers have to design a ski that performs pretty well in all conditions. That's almost an impossible task. The Pilot TS skis solve that by enabling you to adjust the ski's performance and personality instantly, without replacing any parts or even breaking out a single tool. You'll get consistent performance and steering effort even as conditions change.

## FRONT SUSPENSION

R.A.S. 2 front suspension kits improve the cornering ability of your sled by changing the roll center and providing straighter tracking through the big bumps. The kit also lightens up the front by almost 1.76 lb. (0.8 kg) and adds some great style with machined spindles. You can get the kit in 36" (92 cm) wide for mountain sleds and 42" (107 cm) wide for trail sleds, and with or without shocks. And NEW for 2016, these kits will accept the Pilot TS skis. Every configuration is priced as a great value.

## SHOCKS

Take a little weight off your Summit with a set of Fox Float III shocks. More than 5 lb (2.3 kg) lighter than standard coil-over designs, these shocks are specifically calibrated for Summit sleds. And the air spring can be infinitely adjusted to your needs.

If your older shocks are getting a little spongy and showing wear, replace them with a fresh set. HPG + R Front Shocks are high quality dampers used on X package sleds and are rebuildable, lightweight and have clicker-adjustable rebound damping.

Want the best of the best? Upgrade to the KYB Pro 40 kit, the same ultra high quality, ultra high capacity shocks used on our race sleds. They include clicker compression and rebound damping for ultimate tunability, and come set up with the same valving and springs used on our X-RS trail sleds.

## MOUNTAIN REAR SUSPENSIONS

Conditions are constantly changing for mountain riders... the trail up and down, every angle of incline imaginable, wide open spaces and tightly packed trees. The new tMotion Adjustable Limiter Strap enables you to quickly adjust how much the front of the sled will lift under throttle. Want it to pop up and get those skis out of the snow? Leave it in the longer position. Want to keep the front end and skis low for a shallower track approach angle? Just flip the lever and the limiter strap is shortened 1.3" (3.5 cm). Simple, quick and effective.

Get the easiest roll-up and boondocking in snowmobiling by updating to a tMotion Rear Suspension kit and FlexEdge track. They work great individually, but incredibly together. If you already have the tMotion but want to reduce trenching in reverse, consider the Articulated Rear Suspension kit originally used on our go-anywhere sport-utility sleds.

## FRONT SUSPENSION KIT

**36"**

- To update your sled to the Summit X with T3 package.
- Delivers the agility of the original S-36 handling package, plus the benefits of the R.A.S. 2.
- Better straightline tracking on big bumps.
- Lighter weight.
- Great styling.
- HPG shocks.
- Ski stance adjustable from 90 cm to 95 cm.

### eDRIVE 2 CLUTCH

- With double the number of rollers and arms compared to TRA designs, this clutch is designed for low maintenance and long life with 4-stroke powertrains.

**4-TEC 1200 only (2010 and up)**

415129789

**5 890 SEK**

### MAINTENANCE KIT FOR DRIVE PULLEY eDRIVE 2 CLUTCH

(Not illustrated)

- Includes: 6 rollers ass'y, 12 slider shoes, 3 O Rings.

415129781 • All models with eDrive 2 Clutch

**1 190 SEK**

### FLOATING QRS SHORT SHAFT CONVERSION KIT

- Conversion kit allows installation of a removable floating secondary pulley.
- Also provides ability to remove driven pulley without removing countershaft.
- Includes gun-drilled lightweight shaft and all necessary parts and hardware for conversion.

Fits 600 CARB, 600 E-TEC, 800 P-TEK and 800 E-TEC engines

860200832

**4 490 SEK**

### QRS TECH LINK

- Designed for extreme use, this lightweight fully adjustable carbon fiber support helps maintain the driven pulley position through the most extreme loads.
- Mounts conveniently between the front bulkhead and secondary tower.

REV-XM, REV-XS, REV-XP except 550 FAN and ACE 1200 engines

860200783

**1 990 SEK**

### SEA-LEVEL CALIBRATION CLUTCH KIT

Please refer to high altitude / sea-level specification bulletin to find the appropriate clutch kit and components for your vehicle.

860201007

**850 SEK**

860201008

**1 410 SEK**

860201009

**1 410 SEK**

860200394

**1 590 SEK**

### DRIVEN PULLEY CAM FOR QRS ROLLER SECONDARY CAM

- Specially designed for the QRS driven pulley.
- For optimal smooth performance and durability.

**REV-XP**

417126956 • 40°

417126962 • 38°

UPDATE STORY

# 2010 SUMMIT X

## Elevate Your Summit's Ride

So your Summit from just a few years ago runs great, but you want the maneuverability and performance of the newer models. With just a few items, you can affordably revive Your Ride, like we did with this 2010 Summit X.

Before the upgrade

## After the Upgrade

- |   |   |                  |
|---|---|------------------|
| 1 | <b>iMOTION SUSPENSION CONVERSION KIT</b><br>860201215 | <b>3 790 SEK</b> |

\*Installation not included.

Complete instructions with detailed drawings and photographs made the process easy.

**iMotion Suspension Conversion Kit and Track with FlexEdge technology**  
Makes roll-up easier and quicker — holds a sidehill better than a conventional track.

**QRS Tech Link**  
Keeps the clutches better aligned for longer belt life.

**Front Fox Float III Shocks**  
Lightens the front end by up to 6 lb (2.7 kg). Calibrations developed by BRP engineers.

**Rail Ice Scratchers**  
Keeps the slider shoes lubricated and helps keep the engine cool in icy conditions.

Before the upgrade

# UPDATE STORY 2014 RENEGADE

## Keep the Excitement Going

You would like to upgrade your sled? Now it's possible! You can add a little extra performance, added functionality and a refresh look with some key BRP accessories.

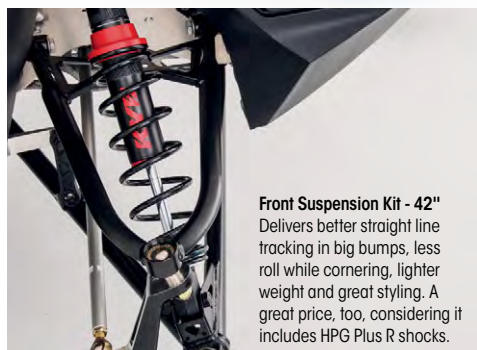

## After the Upgrade

- |   |   |                  |

|   | 860200981   |                  |

\*Installation not included.

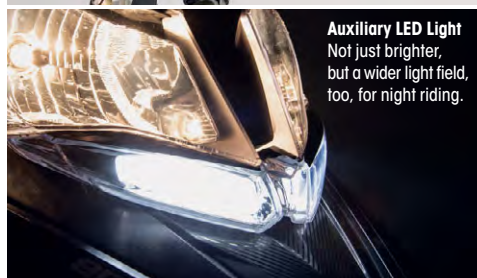

Complete instructions with detailed drawings and photographs – plus plug-and-play designs with the vehicle – made the process easy.

**Front Suspension Kit - 42"**  
Delivers better straight line tracking in big bumps, less roll while cornering, lighter weight and great styling. A great price, too, considering it includes HPG Plus R shocks.

**XC Bumper**  
Adds protection and rugged style.

**Auxiliary LED Light**  
Not just brighter, but a wider light field, too, for night riding.

**Transparent Handlebar Air Deflectors**  
Adds more wind protection with trick lightweight look.

**Signature LED Light for Handlebar Air Deflectors**  
Creates a unique signature look when riding in the dark.

## PERFORMANCE DRIVE BELTS

- High performance drive belts calibrated to maximize your sled's performance.
- Aramid tensile cords used in construction for extra long life and dependability, also delivers a consistent length with minimal belt shrinkage and minimal length adjustments.
- High tensile reinforced fiber elastomer undercords provide minimal dusting and long term flex life.
- Flexweave overcord for superior adhesion and crack resistance.
- Consistent performance during life of belt.
- Quality you can count on for optimum performance.
- Built with distinctive durability features for mountain, trail or fast tracks.

### TIP

It's always good to carry a spare OEM belt and spark plugs on every ride.

## NGK' SPARK PLUG

- You'll see a difference with genuine NGK spark plugs.
- Solid steel terminal reduces the chance of arcing in the plug cap, which interferes with the M.P.E.M.
- A necessity in today's ignition systems.

### RACING STORAGE COVER (UNIVERSAL)

- Provides protection for any snowmobile model.

#### All Models

280000529 • Black with graphics

**1 290 SEK**

## SUPERCLAMP

- Secure your sled with a simple pull of the handle.
- Durable composite construction.
- According to certain state or provincial laws, the use of both Superclamps may be required.

#### Did You Know?

Superclamps are the fastest way to secure your sled to your deck.

#### SUPERCLAMP II

- Innovative trailer tie-down system.
- Silicone rubber pads to protect your skis.
- Front and middle handles allowing easy manoeuvrability.
- Pad lock compatible, becomes a theft deterrent.
- Tension adjustment knob, fits all snowmobiles.

860200950

**1 890 SEK**

#### SUPERCLAMP REAR

- Snowmobile tie-down system for rail.
- Silicone rubber pads to protect snowmobile suspension skid.
- Tension adjustment knob – fits all snowmobiles.
- Screw style deck hook comes standard with all Superclamps.
- Pad lock compatible, becomes a theft deterrent.

860200993

**1 320 SEK**

#### SUPERGLIDE EDGE RAIL TRIM

- To secure Superglides on ramps or decks leaving an encapsulated finished edge.

860201217 • Aluminum

**690 SEK**

#### SUPERGLIDE 2 PRO

- No more ripping up the plywood on your trailer!
- Allows skis to glide with ease.
- Traction knobs incorporated for better traction.
- Moisture minimizing venting.
- Accommodates all sleds with single or dual runner skis.
- Total length of 20 feet.

860201216

**1 090 SEK**

#### T-STYLE DECK HOOK

- For trailers with a channel in the floor.

860200995

**180 SEK**

#### SCREW STYLE DECK HOOK

- Most common.
- Comes standard with all Superclamps.
- Screws into the existing hole where you would screw the old style bar and crank into.

860200994

**180 SEK**

### RATCHET TIE-DOWNS

- 181 kg safe working load.
- 2.5 cm x 3 m strap with Sea-Doo, Ski-Doo and Can-Am logos.
- Deluxe ratchet with rubber handle.
- Coated S hooks.
- Pack of 2.

## TOP REASONS WHY YOUR BRP ROTAX ENGINE DESERVES XPS

We created hundreds of test oils and formula modifications before determining the ideal one.

The additive formulation is unique, designed specifically for the unique needs of E-TEC engines.

Validated through thousands of dynamometer hours, and thousands of trail miles.

We invested more than \$3 million and more than 1 million miles of field testing to develop both 2-stroke and 4-stroke oils over three years.

While the aftermarket spends millions marketing their oils, we are investing millions on developing the best oils to protect your investment. XPS is the only lubricant specifically engineered, developed, tested for your 2-stroke ROTAX engine.

### Did You Know?

XPS products are continually updated and refined to assure maximum protection and performance.

### XPS 4-STROKE SYNTHETIC OIL ALL CLIMATE GRADE

- Unlike other ordinary 4-stroke motor oils, XPS synthetic 4-stroke oil is specifically engineered to meet the particular lubrication requirements of Ski-Doo snowmobiles equipped with Rotax 4-TEC 4-stroke engines.
- Provides easier starting in very cold temperatures.

619590106 • 946 ml  
619590107 • 3.785 L

### XPS 2-STROKE FULL SYNTHETIC OIL

- Full synthetic XPS 2-cycle oil provides the ultimate in wear protection - which is absolutely critical in E-TEC applications where less oil is used.
- Full synthetic XPS has extra detergency to provide optimum engine cleanliness and anti-wear additives for longer engine life.
- The very best product for E-TEC engines, while providing superior performance in all BRP 2-cycle engines with this high performance, low smoke, low odor formula.

619590114 • 946 ml  
619590115 • 3.785 L

### XPS 2-STROKE MINERAL OIL

- Formulated and developed to work specifically in an oil injection environment.
- Flows at -40 °C and offers optimal lubrication at all running temperatures for carbureted engines.
- Can also be used as a pre-mix.

619590100 • 946 ml  
619590101 • 3.785 L

For the full XPS story, visit [www.xpslubricants.com](http://www.xpslubricants.com)

Note: Please contact your nearest dealer for suggested retail prices of oil based products.

### XPS SYNTHETIC CHAINCASE OIL

- The best in multigrade chain lubrication, specifically developed for our high performance models.
- Offers wide operating range of temperatures.

619590098 • 355 ml

### XPS STORAGE OIL

- This specialty oil is a must when putting your Ski-Doo snowmobile away in the spring.
- Specially formulated to protect the engines internal parts from the hazards of rust and corrosion due to condensation during storage or prolonged periods of non-use.

619590094 • 350 g

### FUEL STABILIZER

- Fuel additive to protect against fuel contamination and residue build-up in carburetors and gas lines.
- Today's ethanol blended fuels are hard on a fuel system.

619590096 • 237 ml

### XPS LUBE

- A multipurpose lubricant that prevents rust, corrosion and moisture intrusion.
- Contains active extreme-pressure additives which provide excellent lubrication and antiwear properties.
- Comes in a spray can that works upside down.

619590093 • 414 ml

### HPG SHOCK OIL

- High quality shock oil for performance shocks used in severe conditions.
- Impedes foaming to reduce fade.

619590194 • 1 L

### PRE-MIXED ANTIFREEZE/COOLANT

- Pre-mixed, ready to top up your coolant level.
- Blended to perform best in our Rotax engines with anti-corrosive additive. (Not illustrated)

619590183 1L

619590204 • long life • 946 ml

### XPS MINERAL CHAINCASE OIL

- Dependable mineral-base chaincase protection.

619590099 • 250 ml

### XPS SUSPENSION GREASE

- Designed to protect and lubricate at extremely low temperatures.
- Allows suspensions to perform regardless of conditions.

619590193 • 400 g

### PULLEY FLANGE CLEANER

- Easy-to-use cleaner specifically developed to quickly remove gunk and grime from primary and secondary pulley flanges.
- No rinsing required.

619600022 • 320 g

### XPS ALL PURPOSE CLEANER

219701709 • 946 ml

### XPS MICROFIBER TOWELS

- Made of extremely fine fibers, their soft surfaces have been perfected for polishing painted, gelcoated and hard shiny surfaces.

219701759 • Pack of 2

# 6 ESSENTIAL BRP PRODUCTS TO ENSURE A PROPER TUNE-UP

## MAKE THE RIGHT CHOICE

BRP's commitment to quality means that every snowmobile is engineered to the highest industry leading standards.

Nevertheless, a lack of proper maintenance may cause even the best components to eventually fail.

**BY USING ORIGINAL  
BRP MAINTENANCE  
PARTS, YOU ARE  
TAKING CARE OF  
YOUR INVESTMENT.**

**DRIVE BELT** P. 130

**CARBIDES** P. 120

**XPS SYNTHETIC  
CHAINCASE OIL** P. 131

**CLUTCH MAINTENANCE KIT** P. 127

**IDLER WHEEL KIT** P. 114

**SKIS** P. 116

# USING THE RIGHT OIL MATTERS

The right oil delivers:  
**THE BEST PERFORMANCE**  
**THE BEST RELIABILITY**  
**THE LONGEST LIFE**

It's a balancing act to deliver all three attributes – and only XPS is specifically designed to do just that in Rotax engines.

## YOUR SATISFACTION MATTERS. IT'S WHY WE OFFER OUR OWN OIL.

- There are no regulatory standards for oil performance for the recreational industry.
- Each manufacturer or aftermarket company establishes their own standards.
- We want you to have the best experience with your BRP vehicle, so we set extremely high standards for XPS oil.

## WE'VE INVESTED IN XPS PERFORMANCE.

- We spend millions of dollars developing the right formulas.
- We test every engine type that we manufacture – not just one or two types – for hundreds of hours in the dyno room and hundreds of thousands of miles in real world riding.
- We keep testing and reformulating as technology advances.

## ONE OIL DOES NOT FIT ALL.

### 2-STROKE

Each engine type from a manufacturer has its own characteristics or "personality" that the oil needs to match. One brand might need lower carbon build-up on exhaust valves. Another brand might need more detergency to keep rings free and moving. For instance, XPS Synthetic 2-stroke oils include ingredients no other oil has to complement our unique E-TEC engines. So ask yourself: How can one oil possibly take the best care of every brand and every engine?

### 4-STROKE

Oil used for automobiles (Passenger Car Motor Oils, or PCMOs) are formulated for what automobile manufacturers need for their vehicles – such as fuel economy and easy start-up – NOT what 4-stroke powersports vehicles require for optimal performance. XPS 4-stroke oil puts more emphasis on high viscosity performance, shear stability and optimum torque characteristics for BRP's wet clutches. And it protects against corrosion after a wet day of riding or pressure washing, long storage periods where condensation can become an issue, and oil degradation due to today's inconsistent fuel quality.

XPS is a great value. XPS doesn't cost much more than aftermarket brands over a year's use and delivers real peace of mind. Is it worth using a product that may not deliver the best ownership experience to save \$20\* in a year? **You decide.**

\*Based on BRP data and the 2012 ISMA Snowmobiling Fact Book

**MAKE  
EVERY ONE  
COUNT  
BY USING
